Subject: Microsoft Settlement

I believe that a settlement in the Antitrust case against Microsoft should be final as determined in November of last year. In fact I believe that there should never have been an Antitrust case against Microsoft in the first place. It is time to quit this badgering of the American Free Enterprise system. I am reminded of many instances in my life where the government has interfered in areas where it is not Constitutionally legitimate and the people the hard working public at large has suffered through more regulation and higher costs of living. All I can say on this issue is.... Get the government out of the business of trying to control business. Please pardon my frankness I am appalled at what the government has elected itself to do in the name of justice. This is an oxymoron. Thank you.
